Thursday, January 14, 2021

Since the onset of the pandemic in March, the primary objective at Fairview Seniors Community has been the protection and well-being of our residents, tenants and team members. We are grateful for the sacrifices everyone has made to achieve this common goal.

Today, Fairview Seniors Communities reaches a pivotal point in stopping the spread of covid-19, as vaccinations are being administered within the Community.

**Residents:** This morning, long-term care residents were administered the Pfizer vaccine. Tomorrow morning, retirement suites residents will receive their vaccination.

We were able to be present for the first resident vaccination. We cannot express the overwhelming gratitude and relief to have been a part of this momentous occasion. We want to thank all of you for partnering with us to make this day happen.

**Team Members:** Our team members are starting to receive their second vaccination today. These team members will be the some of the first in the region to be 'truly vaccinated' against the covid-19 virus.

With this great step forward, we are able to advise that Essential Caregivers can resume essential visits in long-term care and retirement starting tomorrow, Friday, January 15<sup>th</sup>, 2021.

We remind you there is an Emergency Stay-at-Home order in effect – only leave home for essential purposes such as food, health care, exercise or work. We share this with you, as you make informed decisions in keeping you and our community safe.

The past ten months have been incredibly difficult for long-term care and retirement. Today marks an incredible success for our Community, and the first step in the journey to returning to life 'pre-pandemic'.

With Kindness,

Elaine Shantz  
CEO

Steve Pawelko  
Executive Director
